Job Description

Join a leading financial services company in Tokyo as a Continuous Testing Specialist. This role focuses on ensuring the highest software quality through structured and automated testing processes.

Client Details

The company is a well-established, large organization in the financial services industry, recognized for its innovative approach to technology and commitment to delivering excellence in its services.

Description

- Design and implement automated testing frameworks to ensure software quality.
- Collaborate with development teams to identify testing requirements and strategies.
- Develop test plans, test cases, and scripts aligned with project goals.
- Monitor testing processes and troubleshoot issues to ensure efficiency.
- Analyze test results and provide detailed feedback to stakeholders.
- Maintain and enhance existing testing tools and methodologies.
- Ensure compliance with industry standards and regulatory requirements in financial services.
- Provide guidance and training on testing best practices to team members.

Job Offer

- Competitive salary ranging from JPY 7000000 to JPY 10000000.
- Opportunities to work on cutting-edge technology in financial services.
- Comprehensive training and development programs for career growth.
- Supportive and professional work environment in Tokyo.
- Chance to contribute to impactful projects in a large organization.

If you are passionate about technology and testing in the financial services industry, we encourage you to apply for this exciting opportunity in Tokyo.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Tomoji Miyashita on +813 6832 8652.

Required Skills

A successful Continuous Testing Specialist should have:

- Educational qualifications in computer science, engineering, or related fields.
- Experience in automated testing tools and frameworks.
- Knowledge of software development life cycles, particularly in financial services.
- Strong problem-solving skills and attention to detail.
- Proficiency in programming languages such as Java, Python, or similar.
- Ability to work collaboratively in a technology-driven environment.
- Understanding of testing in cloud-based or distributed systems.
