Job Description

Our Company

We are a leading engineering services provider known for delivering innovative and reliable solutions across a wide range of building and infrastructure projects. Our team is committed to excellence, collaboration, and continuous improvement.

Key Responsibilities:

- Supervise and lead the ACMV design team to ensure efficient and precise development of design packages.
- Validate engineering drawings, calculations, and related technical documentation.
- Liaise with clients, consultants, and internal departments to facilitate design approvals and coordination.
- Ensure all designs adhere to project requirements, regulatory standards, and contractual obligations.
- Offer expert advice throughout procurement, installation, and commissioning stages.
- Troubleshoot design challenges and recommend practical, cost-effective solutions.
- Drive initiatives for design optimization and value engineering.
- Compile and present technical reports to stakeholders and project teams.

Job Requirements

- Bachelor's Degree in Mechanical Engineering, Building Services Engineering, or a related discipline.
- Minimum of 8–10 years of experience in ACMV design engineering, including 3–5 years in a leadership or managerial capacity.
- In-depth understanding of HVAC/ACMV systems, including system design, load analysis, and equipment selection.
- Strong leadership, communication, and stakeholder management skills.
- Familiarity with local building codes and statutory regulations.
- Proficiency in relevant design software and engineering tools.

Apply online or feel free to contact me directly for more information about this opportunity. Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
