Job Description

Our client is a leading industrial manufacturing company that specializes in Precision Die Casting, CNC Machining, and Sheet Metal Fabrication. As a prominent player in this industry, our client prides itself on its robust Quality Control framework, from design and production to logistics and more, ensuring consistent and high-quality production of die casting and sheet metal parts while keeping defects to an absolute minimum. Join them to be part of a fast-growing team of talents!

Job Descriptions

- Ensure compliance with quality standards, regulations and controls by examining and analyzing records, reports, operating practices, and documentation; and recommending opportunities to strengthen the internal control structure.
- Contribute to the creation and implementation of best practice quality vision, strategy, policies, processes and procedures to aid and improve operational performance
- Conduct root cause investigations and implement corrective/preventative action plans on any non-conforming event.
- To spearhead all QA Operations to systemically drive down bottlenecks that impede the overall QA standards within the organization.
- Demonstrate skill in preventive quality engineering methods, data analysis, critical thinking, structured problem solving (8D), the use of metrics to identify opportunity, and business process improvement.
- Liaise with customer regarding quality feedback and to provide quality support to the organization and manufacturing facilities.
- Maintain and update the Quality Management System (QMS) processes to ensure compliance with ISO standards,

and legal, customer and company requirements.

- Drive individuals and the team to continuously improve in key operational metrics and the achievement of the organizational goals.

Job Requirements

- Min Bachelor's in mechanical/ manufacturing or any related field
- Experience in manufacturing industries (Die- Casting, Sheet Metal, CNC machining) or any related industry
- Minimum 5 years' experience in maintenance in managerial.
- Technically competent and knowledgeable on ISO 9001, ISO 14001, ISO13845, IATF 16949 correlation study,
- GR&R, MSA, SPC, IATF core tools, GD&T, QC 7 tools, Quality plan, product and process knowledge in manufacturing field
- Certified Six Sigma Black Belt qualification is a must.
