Job Description

Our client is a reputable multinational energy solution provider with a strong regional presence and focus on power plant services. As part of their business expansion, they are now looking for Project Engineer (Electrical). You'll be handling projects related to Power Transformers and High Voltage (HV) primary equipment. This is project execution role, ensure that projects delivered on time, within budget, and meet the company quality and safety standards.

Job Responsible:

- Manage the technical and operational aspects of HV grid projects (132kV and above).
- Ensure compliance with IEC/IEEE/JIS standards and engineering guidelines.
- Execute project scope including vendor management, quality control, and site supervision.
- Review technical drawings, specifications, and vendor submissions.
- Support in RFQ/RFP, tenders, and bids for grid business.
- Attend site meetings with clients, consultants, and contractors to resolve issues.
- Maintain project documents, progress reports, and issue tracking.

- Collaborate with internal teams (sales, engineering, accounts, etc.) for smooth execution.

Job Requirements:

- Degree in Electrical / Engineering.
- Minimum 5 years' experience in high voltage primary equipment **(132kV transformers, GIS, switchgear, circuit breakers, substations)**.
- Strong knowledge of international engineering standards.
- Fluent in English (spoken & written).
- Proactive, good teamwork and coordination skills.
