### Job Description

**[job Responsibilities]**

- Own and manage large, complex programs or multiple projects across product and engineering teams.
- Define program vision, mission, success metrics, and drive measurable outcomes.
- Partner with engineering leaders to ensure architectural scalability and alignment with business goals.
- Influence roadmap planning, prioritization, and resource allocation across functions.

- Anticipate risks, resolve ambiguity, and mitigate potential roadblocks before they escalate.
- Drive alignment between business and technical stakeholders through structured discussions and crisp decisions.
- Oversee cross-team collaboration, ensuring effective execution, quality, and delivery.
- Streamline processes, reduce dependencies, and foster innovation by removing architectural or operational bottlenecks.
- Regularly review metrics and create mechanisms for visibility into progress, risks, and outcomes.
- Communicate effectively with senior leadership (Directors, VPs, Founders, Investors) via narratives, roadmaps, and status reports.
- Mentor and guide peers, engineers, and managers; contribute to building a culture of high performance and collaboration.

---

## Required Skills

### **[Necessary Skills / Experience]**

- Proficiency in Japanese (spoken and written) to collaborate effectively with Japan-based teams.
- Bachelor's or Master's degree with 4 to 6 years of technical program management experience.
- Proven experience leading large-scale, cross-functional projects with multiple stakeholders.
- Strong technical breadth in system architecture and scalable tech stacks.
- Ability to define technical direction in ambiguous business contexts.
- Proficiency with program management tools across the requirements-to-delivery lifecycle.
- Excellent written and verbal communication skills in English.
- Strong decision-making, negotiation, and consensus-building skills.
- A proactive team player who thrives in an extremely fast-paced environment.
