Job Description

This is an excellent opportunity for a NW Engineer to contribute to cutting-edge technology initiatives. Based in Tokyo, you will play a pivotal role in ensuring seamless network design infrastructure, operations and support.

Client Details

This company is a large organization, known for its innovative approach to leveraging technology for business operations. The company thrives on delivering exceptional services and solutions to its customers.

Description

Network Implementation:

- Network device deployment, life cycle management and configuration.
- Network project support and solution deployment
- Develop and maintain network documentation, including diagrams, configurations, and procedures.

- Perform regular network configuration audits for proactive issue identification and resolution.
- New network technology evaluation and PoC testing.
- Document network solutions and participate in knowledge transfer and handover activities.

Network Troubleshooting and Support:

- Investigation, troubleshooting and timely implementation of network solution and workaround.
- Perform root cause analysis of network problems and implementation of preventative measures.
- Communicate effectively with stakeholders regarding network issues and projects.
- Provide on-call support for network emergencies as needed.

Job Offer

- Opportunity to work in the heart of Tokyo with a leading Tech organization.
- Exposure to advanced networking technologies and practices.
- Engaging and supportive work environment focused on innovation.

If you are passionate about network engineering and eager to make an impact, we encourage you to apply today

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Jonathan Chua on +813 6832 8931.

Required Skills

A successful NW Engineer should have:

- A strong background in network engineering and related technologies.
- Experience in troubleshooting and resolving network issues effectively.
- Knowledge of network security principles and best practices.
