Job Description

Our client is a multinational company specializing in Design, Manufacturing, Hardware Platform, and Supply Chain Electronics Manufacturing Services (EMS), currently seeking a motivated Sr Manager, Engineering Program / Project Management to join their dynamic and growing organization. You will be responsible for leading large projects and managing design engineers to develop, implement, and evaluate complex designs.

Job Descriptions

- Manage multiple high visibility programs (multiple projects per program) of high complexity (technology, organizationally) and/or business impact.
- Lead cross-functional, global core teams, kick off programs, establish schedules and drive meetings.
- Demonstrate ability to grow cross functional team members by identifying development opportunities and coaching Program Core Team members.
- Manage the program's budget by forecasting actuals against plan/quote for income/revenue, cost/labor & expense.
- Present and communicate status to the business leaders and customers.
- Review and interpret customer specifications and provides customer feedback
- Implement change as directed in the product lifecycle process and recommends process improvements.

Job Requirements

- Min Degree in Engineering or related fields.
- Ability to lead complex, multiple-line engineering projects that may also involve other functions.
- Demonstrate solid understanding of the technical, financial and people aspects of the project.
- Able to create a project/change management plan and ensure project is delivered within the assigned time and budget.
- Ability to create financial plans for your projects, align them internally with your line of management.
- The following competencies are good to have : Coaching, Mentoring, Negotiation, Communication, Presentation, Creative Problem Solving, Customer Interaction, Stakeholder Management, Quality, Lean, D/PFMEA, 8D, Corrective Action, Equipment Safety, DOE.
