Job Description

Lead and oversee development projects integrating in-house and third-party products to meet client needs. Manage cross-functional teams to deliver mission-critical telecom systems successfully.

Client Details

A leading technology company specializing in telecommunications solutions, working closely with top-tier carriers and global partners. Known for fostering innovation and providing opportunities for professional growth within a collaborative and dynamic environment.

Description

- Lead end-to-end project management of system development initiatives.
- Collaborate with domestic and international teams, including software vendors and internal departments.
- Manage requirements gathering, stakeholder communication, and specification discussions.
- Oversee quality, cost, schedule, risk, and progress management for projects
- Coordinate and supervise external contractors and resources.
- Utilize Linux/Unix terminal skills and apply IT infrastructure and network fundamentals.

Job Offer

- Opportunity to lead projects supporting major telecom carriers.
- Collaboration with experts domestically and internationally.
- Professional growth in a mission-critical, high-responsibility role.
- Dynamic, supportive work environment with exposure to cutting-edge telecom technologies.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Ena Kino on +81366276097.

Required Skills

- Minimum 3 years in project management or related roles in system development.
 - Strong interpersonal skills for client and team collaboration.
 - Experienced managing teams
 - Proficient in quality, cost, schedule, and risk control.
 - Comfortable with Linux/Unix shell and basic IT networking concepts.
 - Proactive learner with leadership and communication strengths.
 - Highly responsible, self-driven, and eager to grow professionally.
 - Business-level English
-
