Job Description

COMPANY OVERVIEW

Our client is a global education company that specializes in personalized academic enrichment programs for children.

They're looking for a Division Leader to oversee the full lifecycle of application development projects, ensuring alignment with business goals and providing strong support for global and regional systems.

JOB RESPONSIBILITIES

- Lead rollouts and manage change; coordinate with support teams during releases.
- Oversee planning, development, and support; drive digital transformation and adoption of solutions.
- Ensure governance compliance; conduct training and monitor performance.
- Champion the implementation and adoption of digital solutions.
- Oversee vendor relationships, contracts, and service levels for third-party application services.
- Ensure application quality through testing, code reviews, and performance checks.

- Identify and manage risks including security, data protection, and compliance.
- Track KPIs to drive continuous improvement across operations.
- Maintain clear communication with stakeholders to align requirements and progress.
- Ensure regulatory compliance and data security standards are met.
- Monitor emerging technologies to identify opportunities for innovation.
- Support smooth transitions during application changes through structured change management.

JOB REQUIREMENTS

- Bachelor's degree in IT, Computer Science, or Business and holds relevant certifications (e.g., PMP, CSM, CISSP, ITIL).
- Strong foundation in IT and software development, including lifecycle management, methodologies, and tools.
- Minimally 5 years in a leadership role with proven leadership in managing complex IT projects, digital transformation, and change management.
- Skilled in project management, quality assurance, and business analysis to align tech initiatives with organizational goals.
- Experienced in vendor management, cybersecurity, and regulatory compliance.
- Effective communicator and problem solver with a track record of building high-performing teams.
- Familiar with cloud-native architectures, CI/CD, DevSecOps, and low-code/no-code platforms.
- Demonstrates business acumen and strategic thinking in aligning technology with financial and operational objectives.
- Passionate about education and committed to enhancing learning outcomes through technology.
