About the company:

We are currently searching for an experienced Backend Tech Lead to work with a pioneering company developing cutting-

edge AI solutions for marketing.

Their mission is to make marketing accessible, so that great products and businesses can be seen across the world. They have a presence in Japan, growing by 300% year after year, delivered by a team of skilled and passionate engineers.

The AI products being developed are extremely innovative, unique, and exciting projects for a talented Tech Lead to work on.

Who are you?

- Do you have hands on backend web skills?
- Are you passionate about making a positive impact on the world?
- Can you lead and empower a team of talented software engineers?

Then this is THE position for you.

Why should you apply?

- The company is a global company with offices in Japan, Singapore, Vietnam, Indonesia, the USA, and more. This is an exciting chance for cross-cultural collaboration.
- You will be shaping the next big SaaS line, working to push the boundary of next-gen SFA/CRM products.
- Mentor a team your way, in one of Japan's fastest growing startup companies.

This role goes beyond coding — you'll help solve scaling challenges, guide young engineers, and shape the technical foundations of a product expanding into the enterprise market.

You'll act as a technical leader (not a people manager), focusing 100% on engineering excellence, architecture decisions, and mentoring.

Required Skills

Requirements:

- At least 7 years of developing web services using modern frameworks.
- At least 5 years of backend experience in Python, Ruby, or similar languages.
- Experience with SaaS development.
- 2+ years of mentoring / technical leadership experience.
- Skilled in AWS/GCP and both SQL & NoSQL databases.

Desired skills:

- Team leadership or EM experience
- Automated testing and CI/CD implementation experience
- Vietnamese communication skills (for collaboration with offshore teams)
