Job Description

Company Overview

A leading manufacturer specializing in high-quality rubber thread production, known for its advanced process engineering, commitment to innovation, and strong presence in global markets.

Job Overview

The **Senior Chemist / R&D Head** will oversee laboratory operations, formulation development, and technical innovation to enhance product performance and ensure high-quality standards in rubber thread manufacturing.

Job Responsibilities

- Supervise latex and chemical quality control labs, ensuring accurate testing and compliance with ISO standards.
- Lead compounding and dispersion processes, optimizing formulations for tensile strength, modulus, and elongation.
- Drive R&D initiatives to develop new product grades and improve cost-efficiency through lab and pilot trials.
- Troubleshoot production issues related to viscosity, gelling time, and surface finish, recommending material

improvements.

- Provide technical leadership, training, and documentation while ensuring safety and regulatory compliance.

Job Requirements

- Degree in Chemistry, Polymer Science, or related field.
- At least 8 years of experience in latex compounding or rubber product development.
- Strong knowledge of analytical testing methods and lab instrumentation.
- Proven leadership in R&D and technical team management.
- Familiarity with REACH, Oeko-Tex, and ISO quality systems.
