Job Description

POSITION SUMMARY

In this position, you will be responsible for mechanical engineering and project coordination related to automated systems for the automotive industry. This role involves a wide range of tasks, from understanding customer requirements to mechanical design, vendor collaboration, and system testing.

RESPONSIBILITIES

- Design and specify mechanical components for automated machinery
- Coordinate mechanical aspects of automation projects
- Meet with customers to gather and summarize technical requirements
- Prepare RFQs and request vendor quotations for mechanical components
- Manage vendor relationships for component manufacturing and programming

- Request vendors to build mechanical items and program PLC/HMI
- Review and verify specifications and functionality with vendors
- Support system testing at Hitachi Automation and at customer sites
- Provide mechanical engineering support during customer visits
- Manage project schedules and ensure timely deliverables
- Coordinate suppliers and vendors for smooth workflow
- Assist sales team with technical input and cost estimates
- Prepare quotations for mechanical components
- Participate in customer visits for sales purposes

QUALIFICATIONS

- Degree in Mechanical Engineering or equivalent experience
- Ability to read and interpret mechanical drawings
- Proficiency in 2D and 3D CAD software
- Knowledge of pneumatic systems
- Familiarity with Microsoft Office tools
- Hands-on experience in automation within the automotive sector

LOCATION Covington, Ohio

WORK STYLE Onsite work

SALARY USD 80,000-100,000

BENEFITS

- Medical insurance
- Dental insurance
- Sick leave
- Paid time off
