Job Description

A Global Real estate firm is looking for a Lead Site Reliability Engineer / DevOps Engineer

A Global Real estate firm is looking for a **Lead Site Reliability Engineer / DevOps Engineer**.

In this role, you will help design, build, and maintain the infrastructure that powers our applications and services. You'll ensure systems are reliable, scalable, and secure — while continuously improving deployment pipelines and development efficiency.

You'll work closely with engineers across backend, frontend, and mobile teams to optimize our cloud infrastructure, automate operations, and maintain a high standard of service availability.

Responsibilities:

- Manage and optimize AWS environments (EC2, ECS, Lambda, RDS, CloudFront, S3, API Gateway, ElasticCache, EKS, etc.)
- Implement and maintain infrastructure as code using Terraform
- Support CI/CD pipelines using GitHub Actions or CircleCI for consistent, automated deployments
- Monitor, log, and alert on system performance using modern observability tools
- Troubleshoot production incidents, perform root cause analysis, and implement preventive solutions
- Collaborate with developers to improve application reliability and performance
- Maintain strong security and compliance practices across systems
- Continuously improve operational efficiency using automation and AI-based monitoring or testing tools

Why should you apply:

- Opportunity to work for an exciting & international company
- Utilize AWS knowledge to focus on DevOps & Site Reliability Engineering
- Good base salary + transport, overtime and hybrid WFH workstyle

Company Details:

A global real estate space-sharing firm founded in 2010 with the vision to build beautiful office spaces where people and companies come together to get inspired and do their best work. Since opening our first location in New York City, we've grown into a global network of intentionally designed workspaces grounded in community. Today, we're constantly reimagining how space, technology, and community can help everyone—from freelancers to Fortune 500s—get more out of their workday.

Working Hours: 09:00 - 18:00 Mon-Fri

Working Style: Hybrid (2-3 days in office, other WFH)

Holidays: Saturday, Sunday, and National Holidays, Year-end and New Year Holidays, Paid Holidays, Other Special Holidays etc

Services/Benefits: Skillhouse provides a generous benefits plan including annual paid vacation, paid transportation, pension, healthcare, unemployment and disability insurance contributions, training opportunities, test pay back programs etc.

Required Skills**Required Skills:**

- 5+ years of experience as an SRE, DevOps, or Systems Engineer
- Hands-on AWS experience in deploying and managing production workloads
- Strong knowledge of Terraform and infrastructure as code practices
- Familiarity with CI/CD pipelines and DevOps workflows
- Experience with Linux environments and containerization (Docker)
- Understanding of network fundamentals and cloud security best practices
- Strong communication skills and ability to collaborate across teams
