Job Description

A Global IT Service firm is looking for a Senior Software Engineer for Point Platform

A Global IT Service firm is looking for a Senior Software Engineer for Point Platform.

Responsibilities:

- Design and develop large-scale backend systems as a key member of our agile development team
- Demonstrate a commitment to excellence by delivering high-quality code, robust unit tests, and thorough documentation
- Actively research and integrate modern technologies and methodologies to optimize development productivity and efficiency
- Drive continuous quality improvement through systematic refactoring, collaborative peer reviews, and dedicated mentorship of junior engineers
- Ensure the safe and reliable delivery and ongoing operation of applications throughout their lifecycle, from development to production
- Utilize artificial intelligence and machine learning advancements to significantly enhance development productivity and ensure the highest levels of application performance

Why You Should Apply:

- Great opportunity to be able to work for well-established company
- Cross-departmental communication is possible in an international environment

Company Details:

A global company with a strong presence in multiple business areas. It has achieved sustained growth both domestically and internationally, including in the U.S. and Europe. The company boasts a diverse and international environment and is committed to equal opportunity, offering a wealth of career opportunities. Due to the diverse nature of our business, we handle a wide range of technologies! You can also choose the environment you are most comfortable with, such as Windows/Mac! Meals in the company cafeteria are also free. Our chefs are always coming up with new menu items, so you can enjoy your meal without getting bored!

Holidays: Saturday, Sunday, and National Holidays, Year-end and New Year Holidays, Paid Holidays, Other Special Holidays

Services/Benefits: Social insurance, Pension Plan, Transportation Fee, Free Cantine, Casual clothes and more

Required Skills

- At least 7+ years of working experience in software engineering with a strong foundation in building scalable, distributed systems using Java and/or Kotlin
- Demonstrated ability to mentor junior engineers, contribute to technical decision-making, and collaborate effectively across cross-functional teams
- Strong experience in code reviews, technical documentation, and following software engineering best practices
- Strong experience with CI/CD pipelines, automated testing, and a commitment to maintaining high software quality standards
- Ability to support production systems, including incident management and root cause analysis for issue resolution
- Excellent communication skills, with the ability to effectively collaborate with cross-functional teams and business stakeholders
