Job Description

Title: Jr./Sr. Software Engineer (Desktop Application)

Working Arrangement: Hybrid

We're looking for a talented and motivated developer to join our team and take part in building and maintaining our desktop-based ERP system. If you enjoy solving technical challenges, collaborating across cultures, and working on meaningful business software, we'd love to hear from you!

Key Responsibilities:

- Take ownership of desktop-based ERP systems, ensuring smooth operation and ongoing development.

- Collaborate with stakeholders to design and implement software features and reports based on business requirements.

- Work closely with a development team to resolve technical challenges and align on solutions.

- Coordinate with a project lead and business analyst to plan development timelines and execute tasks accordingly.

- Conduct thorough system testing and address any bugs or issues that arise.

- Produce and maintain technical documentation and other project-related materials.

- For senior-level candidates: lead a development team, oversee task scheduling, perform code reviews, and provide technical guidance.

Qualifications:
- Bachelor's degree in Computer Science, Software Engineering, or a related field.
- Strong experience in C#, .NET, and WPF for desktop application development.

- Familiar with AngularJS or JavaScript, and proficient in working with SQL Server or MySQL databases.

- Background in developing business software such as ERP, inventory, sales, or accounting systems is a plus.

- Able to communicate effectively in English.

Interested candidate, please submit your most recent resume in English by simply clicking "APPLY NOW'
