Job Description

Company Overview

Our client is a leading Japanese construction and engineering firm specializing in infrastructure development, civil engineering, and urban development projects. Renowned for its expertise in large-scale construction, they have a strong international presence and a reputation for delivering high-quality, innovative solutions. They are committed to sustainability and integrating advanced technology into its project execution. As they continue to drive growth and expansion, they are now seeking a Civil Engineer to join their team and contribute to their ongoing success.

Key Responsibilities

- Plan and Prepare method statements, safe work procedures, risk registers, tunnel progress reports, and other tunnel-related documentation.
- Prepare and carry out the presentation of tunnelling works prior to the commencement of works.
- Plan, monitor, and track site progress, manpower mobilization, and equipment deployment.
- Coordinate various subcontractors to ensure work runs smoothly.
- Conduct daily inspection and supervision of bored tunnelling works.
- Supervise work on TBM machines controlling tunnel labour in excavation and ring build.
- Maintain site records of excavated volumes, grouting records, and other construction work.
- Liaise with authorities, consultants, and subcontractors.
- Plan and monitor RC works with the necessary parties.

- Plan & liaise with QECP works at the site.
- Monitor bored pile construction works with the necessary parties.
- Develop and execute comprehensive construction plans, coordinating effectively with clients, subcontractors, consultants, and regulatory authorities to ensure alignment on all project facets.
- Support the Construction Manager by compiling and analysing project reports, facilitating informed decision-making.
- Lead, coordinate, and oversee all civil and structural engineering activities throughout the project lifecycle, ensuring quality and compliance.
- Develop, monitor, and critically review site work programs to optimize workflow and resource utilization.
- Strategically plan and schedule project tasks and resources to meet milestones and deadlines efficiently.
- Take charge of resolving all on-site technical and engineering challenges, providing expert guidance and solutions to maintain project momentum.

Key Requirements

- Academic Qualification: Degree in Engineering
- At least 5 years of engineering experience, with a minimum of 3 years in LTA / tunnelling / MRT projects.
- Proficiency in AutoCAD.
- Strong communication skills and the ability to work independently.
- Demonstrated ability to work effectively as part of a team and with all levels of staff.

Apply online or feel free to contact me directly for more information about this opportunity. Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
