Job Description

We are looking for a Software Engineer for a Backend role.

Our client is a mid sized Japanese tech company focused in automotive tech. The company has recently become listed in the Tokyo stock exchange, and are growing fast! Work in a progressive and flexible company within growth industry with full remote option!

Main tasks include:

- Developing and operating API servers using Golang or Ruby/Ruby on Rails

- Maintaining infrastructure

- Manage documentation for APIs in Japanese

- Position is full remote, although employees can work in the office in central Tokyo also when they want

Required Skills

- 3+ years of experience developing and operating RESTful APIs and managing the documentation for those APIs

- Experience coding with Golang or Ruby/Ruby on Rails (experience with other backend languages also welcome)

- Experience maintaining infrastructure (LB/database storage, etc.)

- Fluent Japanese (both verbal and written), Basic English
