Job Description

Our client is a major Japanese tech company, who offer a range of services from e-commerce to finance. The company has a progressive culture and in some business units more than 50% of empoloyees are non-Japanese. The work style is hybrid - and the company offers significant benefits, such as 3 free meals per day when working at the office.

Main duties:

- Backend system development using Java and Spring

- architecture consideration and system design

- responding to user inquiries.

- Collaboration with related teams within the organization

Required Skills

- 6 years of experience in designing, developing, and operating Web APIs on Linux servers using Java and Spring Framework.

- efficient utilization of RDBMS like Oracle Database and NoSQL databases like MongoDB/Redis

- experience with ElasticSearch.

- Experience with distributed development using GitHub/Bitbucket or similar version control systems and Pull Requests

- Knowledge of Container architecture (Docker, Kubernetes)
