### Job Description

Our client is a major Japanese tech company, who offer a range of services from e-commerce to finance. The company has a progressive culture and in some business units more than 50% of employees are non-Japanese. The work style is hybrid - and the company offers significant benefits, such as 3 free meals per day when working at the office.

Main duties:

- Backend system development using Java and Spring
  - architecture consideration and system design
  - responding to user inquiries.
  - Collaboration with related teams within the organization
- 

## Required Skills

- 6 years of experience in designing, developing, and operating Web APIs on Linux servers using Java and Spring Framework.
  - efficient utilization of RDBMS like Oracle Database and NoSQL databases like MongoDB/Redis
  - experience with ElasticSearch.
  - Experience with distributed development using GitHub/Bitbucket or similar version control systems and Pull Requests
-
