Job Description

Our client is a major Japanese tech company, who offer a range of services from e-commerce to finance. The company has a progressive culture and in some business units more than 50% of employees are non-Japanese. The work style is hybrid - and the company offers significant benefits, such as 3 free meals per day when working at the office.

Main duties:

- Backend system development using Java and Spring
- architecture consideration and system design
- responding to user inquiries.
- Collaboration with related teams within the organization

Required Skills

- 6 years of experience in designing, developing, and operating Web APIs on Linux servers using Java and Spring Framework.
- efficient utilization of RDBMS like Oracle Database and NoSQL databases like MongoDB/Redis
- experience with ElasticSearch.
- Experience with distributed development using GitHub/Bitbucket or similar version control systems and Pull Requests
