Job Description

We are looking for an experienced Data Center Engineer to join our team in Japan

Key Responsibilities:

- Designing DC Hall: Work with teams to design the layout of the data center, including rack placements, power, cooling, and cabling.
- Reviewing Plans: Analyze and review data center plans to ensure space and resources are optimized.
- Documentation: Prepare and maintain design documents, including layout diagrams and technical specifications.
- Implementation Support: Assist during the construction and setup phase to ensure the design is accurately followed.
- Compliance: Ensure designs meet industry standards and local regulations for safety, power, and cooling systems.

The role involves designing and planning the $\,$ Data Center (DC) hall, reviewing technical drawings, and ensuring efficient space usage, power, cooling, and connectivity
