Job Description

Our client, a global leader in electronics manufacturing, is seeking a highly organized and proactive **Program Management Specialist** to support cross-functional program execution. This role is ideal for individuals with a strong background in project coordination, customer engagement, and manufacturing operations.

Job Responsibilities

- Collaborates with senior team members to manage account profitability, including forecasting, planning, and monitoring the execution of strategic initiatives to ensure operational efficiency.
- Oversees order and demand management processes to align with customer requirements and production capabilities.
- Manages Engineering Change Orders (ECOs), coordinating implementation activities such as 4M assessments, readiness reviews, new builds, liability/exposure analysis, rework planning, and Non-Recurring Engineering (NRE) cost tracking.
- Actively contribute to pricing and bid preparation and supports the development and administration of contract terms and conditions.
- Monitors and manages customer satisfaction through both daily interactions and formal mechanisms such as surveys, self-assessments, complaint resolution, and performance reviews.

- Maintains regular communication with customers to ensure alignment, satisfaction, and proactive issue resolution.
- Organizes and facilitates regular program review meetings with internal teams and customers to provide updates on progress, risks, and action plans.
- Addresses and resolves customer issues and complaints, while assessing the impact of order changes on inventory and production schedules.
- Prepares and delivers performance reports and analysis for monthly operational reviews and quarterly customer performance evaluations.
- Works closely with cost engineering, finance, and supply chain teams to analyze cost structures and investigate pricing variances.

Job Requirement

- In-depth knowledge of the manufacturing process, schedules and scheduling requirements, and SCM.
- In-depth knowledge of the business issues associated with manufacturing PCBs. In-depth knowledge of product pricing, contracts and contract negotiations.
- Thorough understanding of business risks and price make up (Value add and Materials)
- Excellent customer contact, negotiation and problem resolution skills.
- Good presentation, database management and computer skills.
- Minimum at least 5 years working experience in related fields
- Minimum education is Bachelor Degree in relevant fields
