### Job Description

## Key Responsibilities:

- Design and perform electrical calculations for Solar PV systems (on-grid and hybrid configurations).
- Prepare Single Line Diagrams (SLD), Bill of Quantities (BOQ), and technical documentation for submission to the Provincial Electricity Authority (PEA).
- · Collaborate with internal project teams and external contractors during installation and commissioning phases.
- Ensure all designs and installations comply with Thai electrical codes and safety standards.
- Serve as the lead electrical engineer for design-related tasks.
- Coordinate with installation teams, including internal staff and regular external workers.
- Initially, this will be a standalone role, with potential for team expansion as project volume increases.

## Qualifications & Requirements:

- Bachelor's Degree in Electrical Engineering or Energy Engineering.
  Preferably holds an Associate Engineer ( ) or Professional Engineer (PE) license.
- Prior experience in solar or electrical system design and installation is a strong advantage.
- Proficiency in design tools such as AutoCAD, PVsyst, or Helioscope.
- · Good communication skills in both Thai and English.
- · Must be based in or willing to relocate to Phuket.
