Job Description

A Global IT Service is looking for a **Project Manager** to manage key projects regarding Software Products projects mainly OTA and device management.

Responsibilities:
- Plan and execute projects according to project schedule, budget and quality benchmarks
- Communicate project tasks and commitments to project team members and stakeholders (sales team and R&D team) effectively
- Work closely with customers (technical and executive level) in order to understand customer expectations and the requirements in a wider view (the "big picture"), and develop effective working relationships
- Work with groups across the organization to gather inputs and define the deliverables, resource requirements and work-plan for the project, and oversee their development and delivery ("matrix management")
- Proactively manage changes in project scope, identify potential risks and crises, and devise contingency plans as needed
- Ability to travel with potential for domestic and international

Why should you apply:
- Fantastic opportunity to advance your career at a global firm that prizes bilingual IT talent.
- Serving clients in 175+ cities across 6 continents, we help customers do business better by leveraging our industry-wide experience, deep technology expertise, comprehensive portfolio of services and vertically aligned business model.

Company Details:
An IT Vendor company headquartered in India, since its entry into the Japanese market in 1998, it has earned the trust of the industry by providing IT services tailored to customer needs while adhering to the strict quality standards and deadlines of Japanese companies. In recent years, this leading IT services company has been focusing on the development of telemedicine and connected cars using IoT and AI technologies.

Services/Benefits: Salary/performance review, Quarterly bonus, Paid holidays, Childcare/bereavement leave, Mobility to work at other clients, Internal promotions, Company laptop provided
Interview Process: 3 rounds

Required Skills

- 5+ years of practical experience in implementation of software projects, preferably to involve both client and server side development and integration
- Experience working with complete software development life cycle activities and custom software development projects
- At least 6 years of experience of SW hands on development or bachelor's degree in computer science or related field, PMP a plus
