Job Description

Our client is a Malaysian manufacturing company specializing in delivering integrated renewable energy and infrastructure solutions. With 25 years of proven expertise, their capabilities extend through advanced electronics manufacturing and strategic industrial park development. Join them and be a part of an ever-growing team!

Job Descriptions

- Conduct team inspections on plant equipment and machinery to identify and address potential issues proactively.
- Oversee manufacturing and assembly processes.
- Ensure housekeeping to vital machine components is carried out after each shift.
- Consistently review SOP and develop policies that improve efficiency without compromising safety or quality.
- Evaluate machine resources to ensure continued productivity, quality control, and minimal downtime.
- Establish a balance between increased productivity and reduce costs of manufacturing operation.
- Create and execute daily, weekly, monthly, and annual production schedule, ensuring adequate manpower.

Job Requirements

- Bachelor's or Master Degree in Industrial Engineering or Operation management or similar technical field.
- Min 5 years of experience as a Production Manager or similar role in a manufacturing or industrial setting.
- Proven track record for excellent project management as well as employee training in productivity and safety.
- Strong technical knowledge of plant operations, Lean principles and new technologies to enhance efficiency and reduce waste.
- Competency in ISO 9001, Safety & Health regulations, and computerized management systems like MES, SAP or similar
