Job Description

The mission of this role as an SDET is to improve the quality of Japan's digital banking system. In this position, you will be responsible for leading quality improvements and testing enhancements.

- Review and improve existing API tests
- Define test strategies for API testing and drive continuous improvement
- Develop and implement CI/CD pipelines

Required Skills

Required Skills and Experience

- Over 5 years of development experience
- Holder of ISTQB (including JSTQB) Foundation Level certification or equivalent knowledge
- Bachelor's degree in Information Technology, Computer Science, or equivalent knowledge
- Experience leading a development team
- Experience in formulating test plans and test strategies
- Experience with code-based API testing tools such as RestAssured or Karate

Preferred Skills and Experience

- Experience in reviewing system architecture
- Experience in improving testability
- Understanding of testing techniques (ISTQB Advanced Level knowledge)
- Japanese proficiency (N2 or higher)
- Experience in AI development and/or experience in using AI tools to improve development processes.

Language Requirements

- English: Business communication skills (TOEIC 700+ or equivalent)
