Job Description

COMPANY OVERVIEW

Fast-growing electronic manufacturing company focused on sustainable, niche-energy solutions, and they are ramping up R&D and production in response to regional infrastructure demands.

JOB RESPONSIBILITIES

- Develop and improve product designs and related processes to meet quality and efficiency standards.

- Coordinate with internal teams and external partners to support new product introductions and design changes.

- Oversee sample preparation and documentation for customer approvals.

- Implement process control measures and drive continuous improvement initiatives in production.

- Provide guidance and training to relevant teams on updated processes and standards.

JOB REQUIREMENTS

- Possesses Bachelor's Degree / Diploma in Engineering, Manufacturing Technology or equivalent.

- Have at least 3 years of experience working in manufacturing industry as new product development / product design roles.

- Strong problem solving and technical skills, knowledge in Solidworks design would be added advantage.

Interested candidates are welcomed to apply online.
