Job Description

Location: Close to BTS Punnawithi, Bangkok

Overview: Our client is a startup Cyber Security Platform provider; they just set business and would like a candidate with full of energy and attitude to contribute success together. You will experience a fresh work environment with open-minded to share idea at work.

Description

- Develop smooth integration between platforms, APIs and data systems
- Design and develop web application using Next.js (Fronted) and Nest.js (Backend)
- Deliver full lifecycle/end-to-end features from system design to deployment
- Integrate with external APIs, data lakes and third-party system to connect intelligence across systems
- Develop and maintain RESTful APIs, backend services and code review to improve performance

- Manage deployment and maintain AWS services (EC2, S3, etc.)
- Collaborate with engineers to deliver secure and scalable cloud solutions on AWS and work with data engineers to maintain clean & efficient data pipelines across systems
- Utilize GitHub to track code changes and coordinate via pull requests and code reviews
- Take initiative in recommending ideas, suggestions, improvements across architecture, tool or product design

Qualification

- 2–5 years of experience as Full Stack Developer (Next.js/Nest.js)
- Prefer candidates who have strong Next.js (Frontend) more than Backend *If have many experiences in Next.js but lacks Nest.js is okay.
- TypeScript-based frameworks and familiarity with MongoDB or others
- Experience in AWS cloud service and integrating external APIs.
- Experience in working with startup company is preferable.
- Good attitude, enthusiastic on work, multi-tasking, hard-working person and flexible on changes.
- A passion mindset who is eager for challenge and full of energy to share work ideas together
