Job Description

«Job Description & Position Highlights»

- Hardware design work involving the design of automotive bodies and sheet metal parts using CATIA-V5
- Opportunity to hone design skills and project management abilities through end-to-end involvement from 3D/2D design to production
- Gain fulfillment by collaborating with other engineers to deliver designs that meet quality standards and requirements
- Work in Toyota City to gain practical experience in the automotive industry and develop expertise in a supportive environment

【Job Responsibilities】

The ideal candidate will design automotive body parts and sheet metal components. You'll be using CATIA-V5 and working closely with engineering teams to manage the design process from start to finish.

- Design and develop automotive body parts and sheet metal components.
- Utilize CATIA-V5 for both 3D and 2D design.
- Work collaboratively with engineering teams to ensure designs meet project requirements.
- Manage the entire design lifecycle, from initial concept to final production.

【Employment Type】

Full-time, Permanent Employee

【Salary】

Based on experience and skill level

【Working Hours】

In accordance with company regulations

【Work Location】

Toyotacho, Toyota City, Aichi
(Nearest Station: Mikawa Toyota)

【Holidays & Leave】

In accordance with company regulations

【Benefits & Welfare】

In accordance with company regulations

Required Skills

【Required】

- JLPT: N3 or Higher
- A minimum of one year of professional experience using CATIA-V5 (3D/2D).
- Proven experience in designing automotive parts.

【Preferred Experience】

- Candidates with experience in automotive bodies and sheet metal parts are highly preferred.
