Responsibilities:

- Lead supplier complaint reduction initiatives
- Guide suppliers in meeting quality requirements and applying tools such as 8D, FRPS, and SQRM
- Drive discussions and resolutions for supplier-related escalation cases
- Train and support supplier complaint coordinators in SCMS usage and maintenance
- Analyse supplier complaint reports to identify improvement opportunities
- Support global Supplier Quality & Development programs in the region
- Assist Product Development in selecting new suppliers and supporting joint development projects
- Ensure 3PM suppliers hold the required quality certifications and support customer-required certificates
- Support and occasionally facilitate customer audits for 3PM suppliers
- Communicate customer requirements to suppliers and ensure implementation
- Execute regional audit plans, including activities, reporting, and database updates
- Create and revise quality documents in the HIMDOC database
- Support internal and external audits, including DQS and customer audits
- Support the MOC process for Raw/Packaging/3PM projects

Requirements:

- Bachelor's degree or above in chemistry or engineering
- More than 6 years of experience in industry (Quality and/or Engineering)
- Experience in ISO 9001, IATF 16949 standards, Food Safety, GMP
- Prior experience in internal and external audits using a process approach
- Experience in Customer Specific Requirements
- Core tools knowledge (PPAP, APQP, MSA, CEP, FMEA)
- Proficient in Japanese and English

Company Description

We've been a driving force in the Japanese bilingual recruitment market, providing high quality candidates for our clients and access to the best jobs for over 20 years. We operate a team-based profit share system which, we believe, sets us apart from the majority of competitors by enabling us to always put the interests of our clients and candidates first. That means we can find the best fit for employer and job seeker, and we never push people into unsuitable roles.
