Job Description

Responsibilities:

- Oversee and manage process engineering activities across key manufacturing stages, typically including SMT (Surface Mount Technology), DIP/THT, and Final Assembly/Test (FCT).
- Lead the development and documentation of robust manufacturing processes by creating, updating, and maintaining Standard Operating Procedures (SOPs), Work Instructions, and Process Flows.
- Responsible for DFM (Design for Manufacturability) analysis and providing technical feedback to R&D/Design teams to ensure new products can be manufactured efficiently and cost-effectively.
- Drive continuous improvement initiatives using methodologies like Lean Manufacturing, Six Sigma, and Kaizen to optimize cycle times, reduce variability, and enhance overall equipment effectiveness (OEE).
- Analyze production data, yields, and defect rates to identify root causes of manufacturing issues and implement permanent corrective actions (PCAs).
- Manage the selection, qualification, and implementation of new manufacturing equipment, tooling, and materials to improve process capability and handle new product introductions (NPI).

Qualifications:

- 7 years up SMT&DIP PE experience
- Knowledge of PCB design review
- Ability of fixture design and design guide line set up
- Knowledge of process data CPK analysis
- Can communicate in English
