Associate Degree/Diploma

Visa Status

No permission to work in Japan required

Job Description

Purpose To design, implement, and continuously improve export packing methods for CKD/SKD units and components, ensuring adherence to quality standards, cost efficiency, and compliance with international shipping norms and Yamaha global guidelines.

Educational Qualification

- B.E./B.Tech in Mechanical, Automobile, or Industrial Engineering

Skills

- Expertise in export packing processes for CKD/SKD units
- Knowledge of packaging material engineering (corrugated, wooden, steel, returnable containers)
- Proficiency in CAD software (AutoCAD, SolidWorks) for packaging layout preparation
- Familiarity with customs regulations, export documentation, and statutory compliance
- Understanding of Lean manufacturing, Kaizen, and cost optimization methods
- Working knowledge of SAP/ERP systems

- Strong analytical, communication, and cross-functional coordination skills
- Awareness of EHS and sustainability requirements in packaging

Key Responsibilities

- Design and validate export packing methods for CKD/SKD kits and spare parts
- Optimize material usage, packing space, and logistics cost without compromising quality
- Conduct durability tests (drop, vibration, humidity) to validate packing standards
- Implement packing Kaizens for cost reduction, space saving, and sustainability
- Coordinate with Logistics, SCM, and overseas distributors for smooth export operations
- Monitor and improve supplier packaging quality and compliance
- Support manufacturing engineering projects related to packaging automation and efficiency
- Ensure compliance with ISO/IATF standards and Yamaha packing guidelines

Knowledge Requirements

- International shipping terms (Incoterms: FOB, CIF, DDP, etc.)
- Global export packing standards and sustainable packaging trends
- ISO 9001, IATF 16949, ISO 14001 requirements related to packaging
- Hazardous goods packaging knowledge (if applicable)
