General Requirements

Minimum Experience Level
Over 3 years

Career Level
Mid Career

Minimum English Level
Daily Conversation

Minimum Japanese Level
None

Minimum Education Level
Associate Degree/Diploma

Visa Status
No permission to work in Japan required

Job Description

We are looking for talented Data Scientists to join our team. We seek individuals with a strong foundation in at least one of these areas and a genuine enthusiasm for continuous learning.

Qualifications
- Bachelor's degree in Computer Science, Computer Engineering, Mathematics, Statistics, or a related discipline.
- Strong interest in creating innovative machine learning models and algorithms to address practical problems.
- Hands-on experience in advanced computer vision, image processing, machine learning, NLP, and large language models (LLMs).
- Proficiency in Python and related libraries (e.g., Scikit-learn, Pandas, LLM frameworks).
- Familiarity with deep learning frameworks such as PyTorch or TensorFlow and architectures like CNNs, RNNs, attention mechanisms, and transformers.
- Proven ability to build robust predictive models for tasks like classification and regression.
- Excellent communication skills both written and verbal.
- Analytical mindset, creativity, and a commitment to personal growth.

Responsibilities
- Develop and implement machine learning models using multimodal data (text, images, video) to solve complex real-world problems.

- Collaborate with cross-functional teams including ML engineers, data scientists, and business stakeholders to deliver AI-driven solutions from research to production.
- Analyze large-scale datasets to extract insights, design features, and improve model performance.
- Stay up-to-date with emerging technologies in AI, computer vision, NLP, and deep learning to continuously enhance solutions.
- Ensure production-ready code quality and contribute to building scalable, maintainable AI applications.
