Job Description

Our client is a German multinational pump manufacturer for the past 150 years, they are currently looking for a Senior Application Engineer with a background from the Pump solutions and Building services segment.

Job Responsibilities

- Provide technical support to clients on pump systems and building services applications.
- Review project specifications and design suitable pump solutions for commercial and industrial buildings.
- Prepare technical proposals, sizing calculations, and system layouts.
- Work closely with sales teams to support pre sales and post sales activities.
- Conduct site visits, troubleshoot system issues, and recommend corrective actions.
- Deliver training to clients, consultants, and contractors.
- Coordinate with product, engineering, and service teams to ensure smooth project delivery.
- Support commissioning, testing, and handover processes.
- Track project timelines and ensure technical compliance with standards.
- Maintain updated knowledge of relevant codes, local regulations, and market trends.

Job Requirements

Five to seven years of experience in building services, pump systems, or HVAC MEP.
Strong technical knowledge of pump sizing, hydraulics, and building mechanical systems.
Degree in Mechanical Engineering or related field.
Experience supporting consultants, contractors, and distributors.
Ability to interpret drawings and prepare system designs.
Strong analytical and troubleshooting skills.
Good communication skills in both client facing and internal coordination.
Willingness to travel for site work.
