### Job Description

#### COMPANY OVERVIEW

Our client is a technology service provider specializing in Intelligent Automation (IA). They partner with large enterprises in their Digital Transformation journey and help them and their employees thrive in the Future of Work.

#### JOB RESPONSIBILITIES

- Design, build, test, and implement automation solutions leveraging the LAIYE RPA platform.
- Manage the entire project lifecycle, including process analysis, documentation (PDD/SDD), development, UAT, and production deployment.
- Work closely with business stakeholders to gather requirements and convert them into robust technical workflows.
- Maintain and optimize existing bots to ensure reliability and operational efficiency.
- Deliver solutions that meet best practices for scalability, maintainability, and performance.

## JOB REQUIREMENTS

- Proven experience in developing RPA solutions and delivering automation projects. An advantage if you have experience in using the LAIYE platform.
- Deep knowledge of RPA principles, best practices, and solution design patterns.
- Ability to work independently while managing multiple priorities throughout the full project lifecycle.
- Strong proficiency in scripting or programming with Python and/or VB.Net.
- Excellent problem-solving skills with the capability to communicate effectively with both technical and non-technical stakeholders.
- LAIYE RPA Developer Certification is highly advantageous.

Working Location: Singapore
