【募集職種】

インフラ関連エンジニア

【業務内容】

Building the system (including network, servers, and capacity planning)

Operational design (such as backup, performance tuning, alert configuration, etc.) is also important.

Responsibilities:

Cloud Environment Setup & Management

- Design, build, and manage Azure or AWS environments (Azure preferred).
- Configure and maintain cloud networking and security policies.

Infrastructure Build

- Build and configure servers, networks, and storage systems.
- Perform capacity planning for scalability and performance.

Operational Design

- Implement backup strategies, monitoring, and alert systems.
- Optimize performance and ensure disaster recovery readiness.

OS Administration

- Manage Windows/Linux systems on cloud platforms

Required Skills

Skills:

- 3+ years in cloud infrastructure engineering.
- Strong experience in Azure or AWS setup and management.
- Good understanding of cloud networking and security.
- Experience managing mid-sized cloud environments (200+ VMs).
- OS administration skills (Windows/Linux on cloud).
- Knowledge of on-premises datacenter environments.
- Relevant cloud certifications

Active Directory Admin

1．Good understanding about onprem and Azure AD

2．Atleast 4-5 years' experience in setting and AD administration

3．Experience in working in multi domain environment , Domain consolidation

4．Managing and supporting atleast 3000 user environment

5．Good understanding about Windows OS environment, AD integration

6．Understanding about Entra ID, Okta etc will be desirable.

7. Relevant Microsoft certifications.

8. Good communication skills and user and stake holder management skill

Bilingual with very good English skill – N2 and above preferred

Note : This is not end user AD skill, but AD administration skill.

Company Description
