Job Description

The ideal candidate will be responsible for understanding technical requirements, communicating clearly with both client and internal teams, and ensuring timely and quality delivery. The candidate must possess a blend of technical expertise, communication skills, and coordination capabilities.

The ideal candidate will have a strong technical understanding of engineering services using multi- disciplinary competencies like Mechanical, Electrical, Electronics, IoT, Software etc

- Act as the primary point of contact between customer teams and offshore/remote development teams.
- Understand customer requirements, translate them into actionable tasks, and ensure technical feasibility.
- Prepare and deliver technical documentation, functional specifications, and meeting notes.
- Coordinate daily/weekly sync-up meetings, track action items, and follow up on dependencies.
- Ensure smooth communication flow and address any technical or process gaps between teams.

- Review deliverables from the development team to ensure they meet quality and specification standards.
 - Escalate issues in a timely manner and work collaboratively to resolve blockers.
 - Maintain project timelines, track progress, and support delivery management.
 - Build trusted, long-term relationships with customer stakeholders, acting as a strategic advisor and advocate for their needs.
 - Coordinate with internal teams (sales, delivery & support functions) to deliver tailored solutions and ensure seamless client experiences.
 - Understand and adapt to Japanese business etiquette, communication style, and decision-making processes.
 - Protects organization's value by keeping information confidential.
-

Required Skills

- Bachelor's degree in Engineering
 - Overall experience of 8+ years
 - 5+ years of experience in technical coordination, project engineering in Japanese market
 - Excellent communication and interpersonal skills.
 - Business level Proficiency in Japanese (JLPT N3 or higher preferred) is a must.
 - Ability to manage priorities, multitask, and work independently.
 - Experience working with geographically distributed teams is preferred.
 - Experience in customer-facing roles.
 - Exposure to tools like JIRA, MS Teams, Trello, etc.
 - PMP/CSM certification is a plus.
 - Domain knowledge in Industrial products or Industrial Machinery or Plant engineering is a must
-
