Job Description

Join our team as a Senior Java Engineer, where you will lead the design, development, and operation of backend systems for a major e-commerce platform. This role offers the opportunity to work on high-traffic systems and make strategic technical decisions.

Client Details

Our client is a leading tech firm known for its innovative solutions and commitment to excellence. They operate on a global scale, providing top-tier services and products in the technology sector.

Description

- Understand business requirements and deliver features with high quality and speed
- Lead projects or teams as a senior engineer, making technical decisions under complex circumstances
- Design, develop, test, and operate new user-facing features for large-scale e-commerce systems
- System design, implementation, testing, and release for various development projects
- Handle operations, including inquiry management, investigation, and other operational tasks

Job Offer

- Competitive salary and benefits package
- Opportunities for professional growth and development
- A collaborative and innovative work environment
- Access to the latest technologies and tools

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serena Wu on +81 3 6627 6137.

Required Skills

- 5+ years of technical lead experience (e.g., high traffic web system architecture design, technical decision making)
- Experience leading the design of scalable and maintainable systems, strategically guiding the service's future direction
- Experience in service monitoring and production environment troubleshooting/reporting
- 5+ years of Java/Spring Boot web application development experience
- 5+ years of REST API design and development experience, familiar with JUnit testing and code review
- Experience with relational databases (Oracle or MySQL)
- Experience using Tomcat or Weblogic
- Experience with Linux, Gradle, Git
- Experience with CI/CD using Jenkins or other tools
- Knowledge and experience with container architecture such as Docker, Kubernetes
- Strong communication skills in English

Company Description

Our client is a leading tech firm known for its innovative solutions and commitment to excellence. They operate on a global scale, providing top-tier services and products in the technology sector.
