Job Description

Our client is an international Design & Build construction company, specializing in the design and construction buildings, warehouses, data center, commercial buildings and more. They are currently looking for Mechanical Engineer to support site execution for M&E works, ensuring installation quality, progress and coordination with consultants and subcontractors.

Responsibilities: -

- Supervise mechanical works (HVAC, Plumbing, Fire Protection) on site
- Coordinate with consultants, subcontractors and internal teams
- Review drawings, method statements and technical submissions
- Monitor progress, quality and safety compliance
- Attend the meetings and resolve technical issues

Requirements:

- Diploma / Degree in Mechanical Engineering
- Minimum 3 - 8 years site-based experience
- Strong understanding of M&E systems
- Experience in large-scale project preferred
