Job Description

Job Summary

We are seeking a skilled **Robot Service Engineer** to join our team. The ideal candidate will have hands-on experience with industrial robots and automation systems, strong problem-solving abilities, and flexibility to travel and work varied hours. This role involves **installation, integration, troubleshooting, and maintenance** of robotic systems across multiple industries.

Key Responsibilities

- Install, commission, and integrate robotic systems (FANUC, Yaskawa, ABB, Panasonic, etc.) at customer sites.
- Perform preventive and corrective maintenance on robotic and automation systems.
- Troubleshoot complex mechanical, electrical, and programming issues.
- Work on PLC programming and integration with robotic systems.
- Provide technical support and training to customers on robot operation and safety.
- Maintain accurate service documentation and reports.
- Collaborate with cross-functional teams to ensure timely project execution.

Required Skills & Qualifications**Experience**

- Minimum 2 years in current firm with hands-on experience in robotics or working with a robot integrator.

- Familiarity with industrial robots (FANUC, Yaskawa, ABB, Panasonic, etc.).

Technical Skills

- Knowledge of PLCs, robotic integration, and service.
- Strong programming mindset and ability to work with robot programming languages.
- Practical skills in mechanical and electrical troubleshooting.

Soft Skills

- Excellent communication skills in English and Hindi (read, write, speak).
- Strong problem-solving, system thinking, teamwork, and time management abilities.

Other Requirements

- Ready to work 24x7 and relocate if required.
- Own conveyance for local travel.
- Willingness for frequent travel; local candidates preferred.
- Industry contacts in general manufacturing will be an added advantage.

Preferred Qualifications

- Experience in automotive or general manufacturing industries.
- Knowledge of safety standards and industrial networking protocols.
