

## PR/096464 | Circular Manufacturing Lead

### Job Information

**Recruiter**

JAC Recruitment Singapore

**Job ID**

1572293

**Industry**

Chemical, Raw Materials

**Job Type**

Permanent Full-time

**Location**

Singapore

**Salary**

Negotiable, based on experience

**Refreshed**

January 27th, 2026 07:00

### General Requirements

**Minimum Experience Level**

Over 3 years

**Career Level**

Mid Career

**Minimum English Level**

Fluent

**Minimum Japanese Level**

None

**Minimum Education Level**

Associate Degree/Diploma

**Visa Status**

No permission to work in Japan required

### Job Description

#### COMPANY OVERVIEW

This Singapore-based materials innovation and remanufacturing firm, founded in 2023, focuses on transforming end-of-life aerospace assets into high-performance, traceable, and low-emission materials for advanced manufacturing sectors. Its work centres on reclaiming components—such as carbon fibre, aluminium, and engineered alloys—from retired aircraft and converting them into reliable, high-value industrial inputs.

#### JOB RESPONSIBILITIES

We are seeking an experienced and hands-on Circular Manufacturing Lead (or Factory Manager / Facilities / Plant Representative) to oversee daily operations, process optimisation, and team management at a growing circular-materials production facility. This role encompasses operational leadership, R&D execution, and technical supervision within a chemical-processing and advanced-materials environment.

- Lead daily plant operations and ensure smooth production

- Guide a small team of technicians, operators, and interns
- Troubleshoot and resolve process issues on the spot
- Support R&D activities and help bring new ideas to production
- Improve process efficiency, yield, and quality
- Ensure safety, environmental, and operational compliance
- Maintain records, reports, and documentation
- Collaborate with internal teams to enhance workflows and SOPs

#### JOB REQUIREMENTS

- Degree in Materials Engineering, Chemical Engineering, or similar
- 3–5 years experience in manufacturing, process engineering, or chemical plant operations
- Comfortable with hands-on work in industrial or lab settings
- Experience with reactors, composite materials, or chemical processes
- Strong troubleshooting skills and attention to safety
- Good communication, leadership, and documentation abilities

Working Location: Singapore
