Job Description

Job Title: Manager, Financial Data & Reporting

Location: Singapore - Central

Your New Company

A Singapore-based distributor specializing in mobile phones, IT products, and consumer electronics has established a strong footprint across Asia and emerging markets. Founded in 2003, the organization has built a reputation for bridging global brands with underserved regions through strategic distribution and localized market development. With operations spanning 12 countries including offices in Sri Lanka, Myanmar, Nepal, and Bangladesh, it emphasizes customer-centric sales, long-term partnerships, and tailored support for retailers. Its agile approach and deep regional expertise make it a trusted partner for brands seeking growth in high-potential markets.

Your New Role

- Develop and maintain a single, reliable data platform for Sales, Finance, Supply Chain, and Marketing. Ensure all reporting aligns with CFO-approved figures and eliminate duplicate or inconsistent data sources.

- Establish clear data ownership, validation processes, and documentation standards to maintain accuracy and consistency across all functions.
- Provide analysis on margins, pricing, currency fluctuations, and program performance. Identify risks and deliver actionable insights to support business decisions.
- Manage weekly dashboards and monthly reports for leadership. Support budgeting, reviews, and ad-hoc requests with timely, accurate data.
- Work closely with Finance, Sales, SCM, Marketing, and IT teams. Promote best practices for data usage and interpretation.
- Partner with IT to improve data tools and automate reporting processes, reducing manual effort and increasing reliability.

Key Qualifications for Success

- Bachelor's degree in Finance, Accounting, Data Analytics, Economics, or related discipline.
- At least 5 years of experience in data management, analytics, FP&A, or finance.
- Strong understanding of P&L, margins, cost structures, and currency exchange.
- Advanced proficiency in Excel or Google Sheets; experience with BI tools such as Power BI or Tableau.
- Familiarity with ERP systems.
- Background in distribution, FMCG, telco, or consumer electronics is an advantage.
- Must be a Singapore Citizen or Permanent Resident.
- Immediate or short-notice availability preferred.
