Job Description

- Act as the senior technical authority for enterprise customer environments

- Lead technical discovery to understand business and infrastructure requirements

- Design high-level, scalable IT architectures for complex environments

- Support solution delivery, adoption, and long-term technical success

- Provide technical guidance during demos, PoCs, and proposal stages

- Act as an escalation point for architectural and design decisions

- Collaborate with internal teams to resolve customer technical challenges

- Support cross-functional initiatives and drive technical outcomes

- Leverage modern tools, including AI-based solutions, to improve efficiency

Required Skills

- Strong background in enterprise IT infrastructure and architecture

- Experience with storage, backup, virtualization, and Linux environments

- Knowledge of cybersecurity and cyber resilience concepts

- Ability to lead technical discussions with senior stakeholders

- Comfortable working independently and driving decisions

- Strong documentation and presentation skills

- Experience working cross-functionally on complex projects

Nice to have

- Public cloud platforms (AWS, Azure, GCP)

- Disaster recovery and business continuity

- Distributed systems

- Networking and security fundamentals

- Scripting or automation experience
