Job Description

Purpose

To ensure smooth and efficient assembly line operations by developing, implementing, and continuously improving assembly processes, tools, and methods, thereby enhancing productivity, quality, and cost efficiency.

Educational Qualification

- B.E. / B.Tech in Mechanical / Production / Industrial Engineering or equivalent.

Skills Required

- Strong knowledge of assembly line processes and industrial engineering concepts.
- Team handling and leadership skills.
- Hands-on experience with assembly jigs, fixtures, tooling, and line balancing.
- Knowledge of lean manufacturing, Kaizen, and TPM practices.
- Familiarity with AutoCAD / CATIA or similar design tools.
- Good communication and coordination skills.

Key Responsibilities

- Design, develop, and optimize assembly processes to improve efficiency and quality.
- Prepare and implement Standard Operating Procedures (SOPs) and work instructions for assembly operations.
- Conduct time studies, line balancing, and capacity planning for assembly lines.
- Implement cost reduction activities through process improvement and automation.
- Support new model assembly line preparation, trials, and mass production setup.
- Collaborate with production, quality, and R&D teams for process improvements and issue resolution.
- Ensure adherence to safety standards and ergonomic guidelines in assembly operations.
- Drive continuous improvement activities (Kaizen, Poka-Yoke, 5S).

Knowledge Required

- Knowledge of motorcycle/automobile assembly processes.
- Understanding of quality systems (ISO/TS standards).
- Knowledge of lean manufacturing and problem-solving tools (QC tools, Why-Why analysis, FMEA).
