Job Description

COMPANY OVERVIEW

A leading regional hub delivering AI-driven digital transformation and smart-city solutions, enhancing security, efficiency, and quality of life across Asia Pacific.

JOB RESPONSIBILITIES

- Lead ongoing projects focused on enhancing end-user workspace experience, including collaboration, mobility, performance, security, and service levels.

- Contribute to the development of client computing engineering and digital workspace strategy and roadmap.

- Assist in creating standards and policies for client endpoint computing (e.g., Microsoft Windows and mobility), Intune device management, Purview Information Protection, and application control.

- Provide expertise to regional teams on modernized end-user computing tools and workspaces, while collaborating with global headquarters teams.

- Partner with project teams to deliver key initiatives that support organizational transformation, ensuring alignment of endpoint computing architecture, solutions, processes, standards, and service delivery.

- Coordinate with internal teams on delivery plans for major projects.

- Support the development and implementation of target architectures.

- Prepare documentation for all target architectures and solutions, and present project progress reports.

- Ensure timely and clear communication of project status and progress to stakeholders and IT teams.

JOB REQUIREMENTS

- Bachelor's in IT/Computer Science/Engineering with atleast 6 years in End User Services.

- Hands-on experience with Intune administration and device management.

- Microsoft certifications (M365, Endpoint, Azure), ITIL certification is good to have.

- Good knowledge of Microsoft 365, Active Directory, DNS, DHCP, Group Policy, and modern authentication.

- Experience with VDI, SCCM/Intune/MECM, Windows OS deployment, and collaboration tools.

- Familiarity with Purview Information Protection and device management platforms.
