Job Description

We are seeking a highly skilled Embedded Software Engineer to join our international engineering team focused on next-generation automotive and ADAS systems.

Required Skills

- 3+ years of hands-on experience in C++ development (intermediate or above).
 - Experience in the automotive industry or embedded software development for in-vehicle systems.
 - **Preferred Qualifications:**
 - Experience with AUTOSAR Classic or AUTOSAR Adaptive (configuration, development, and integration).
 - Experience in ASPICE-compliant development environments.
 - ADAS system development project experience.
 - Knowledge and experience in computer vision and architecture design.
 - Experience with CI/CD pipelines, automated testing frameworks (e.g., GoogleTest), and Python scripting.
 - ROS experience is a plus.
 - Development experience in Linux environments.
 - English: business-level proficiency.
 - Japanese: reading, writing, and technical meeting communication (approx. Upper N3).
 - Proactive, self-driven, and able to build consensus within a team.
-
