Job Description

【求人No NJB2320546】

- ・ Collaborate with R D leaders and functional teams to assess resource needs and provide insights to support planning decisions
- ・ Support analysis of project and non project workload impacts on headcount and budget
- ・ Track actual headcount and effort data and help interpret trends and variances
- ・ Contribute to ongoing process improvements in time tracking and resource forecasting
- ・ Build effective partnerships with both local and global stakeholders
- ・ Prepare and deliver reports and materials for leadership reviews and portfolio meetings
- ・ Contribute to special cross functional projects as needed

Required Skills

【MUST】

- Understanding of basic resource concepts such as FTEs headcount and capacity
- Strong Excel skills (e.g. pivot tables formulas charts)
- Exposure to project planning operations or business analysis
- Ability to communicate effectively in English (written and verbal) in a global environment
- Interest in the pharmaceutical or life sciences industry
- Analytical mindset with a practical problem solving approach
- Comfortable navigating ambiguity and learning new concepts on the job
- Able to manage multiple stakeholders and communicate clearly across functions
- Self motivated and eager to contribute to the evolution of a growing function

【WANT】

- Experience working in or supporting pharmaceutical R D or clinical development
- Familiarity with project management tools (e.g. Planisware MS Project etc.)
- Experience working with or building simple resource planning models or templates
- Understanding of the drug development process
- PMP or other project management training or certification

Company Description

■医療用医薬品の研究開発、製造、販売等
