### Job Description

«Job Description & Position Highlights»

- Responsible for PMO operations and materials/tools management for technical projects
- The rewarding challenge of overseeing progress, budgets, and dependencies across multiple projects
- Exerting influence through establishing project management methodologies and guiding teams
- Supporting career growth through hybrid work arrangements and learning support platforms

### 【Job Responsibilities】

#### ■A Snapshot of Your Day

Technical Program Management Office (PMO) work is accountable for providing central expertise, support, and control for an organization's technical projects

Stock management of tools, equipment and parts.

To maintain the status of each WF warehouse (primarily in Hokkaido but nationwide) in a current and appropriate condition.

#### ■How You'll Make an Impact

- Developing technical program/project management best practices/templates and providing training/mentoring to project teams
- Monitoring dependencies across multiple inter-related technical projects
- Gathering and reporting consolidated technical project status and financial information to leadership
- In some organizations may serve as a central governing body to review/audit adherence to methodologies, budgets, and timing
- In some organizations may provide full staffing and management for the organization's major technical projects/programs

<Stock management of tools, equipment and parts.>

- Management of all tools, equipment and components requiring calibration
- Ordering and searching for tools, components and equipment within the warehouse
- Assessing whether management status is appropriate and implementing corrective action where necessary
- Submission of maintenance certificates for all equipment subject to periodic inspection and distribution to relevant parties
- Responsible for the dispatch and collection of tools, components and equipment, and logistics management of materials.
- Coordinating the dispatch status of tools, parts, and equipment with site managers  
※Confirming the return status of tools, parts, and equipment requiring packaging, dispatch requests, receipt confirmation, or return
- Managing the replacement of tools, parts, and equipment unsuitable for operations and monitoring damage rates
- Creating toolkits for key components, signing compliance documents for delivered equipment, and attaching calibration and safety documentation.

#### ■Rewards/Benefits

- Opportunities to work with diverse team and gain regional experience.
- Readily available learning platform to support your career growth.

#### ■About the Team

Our Corporate and Global Functions are essential in driving the company's strategic initiatives and ensuring operational excellence across various departments, business areas, and regions. These roles support our vision to become the most valued energy technology company in the world. As part of our team, you contribute to our vision by shaping the global energy transition, partnering with our internal and external stakeholders, and conducting business responsibly and in compliance with legal requirements and regulations.
