Location
Hanoi city, Vietnam / Philippines

Company and Job Overview
A global technology organization delivering advanced meteorological data solutions and collaborating with public-sector agencies across multiple countries.

Job Responsibilities

- Build and maintain strong working relationships with national meteorological agencies and relevant government bodies to support ongoing projects.
- Identify technical challenges faced by partner agencies and coordinate appropriate technical guidance or improvement initiatives.
- Support onboarding, training, and day-to-day utilization of the company's weather data dashboards and operational tools.
- Provide field assistance during extreme weather situations such as typhoons or heavy rainfall events.

- Coordinate performance reviews and produce analytical reports to assess the impact of technical support activities.
- Act as a communication bridge between local stakeholders and the global headquarters for regular updates and joint initiatives.
- Participate in long-term partnership development, including cooperation frameworks, agreements, or technical collaboration models.
- Travel to partner sites and attend training sessions abroad when required.

Job Requirements

- Solid understanding of (or strong motivation to learn) meteorology, IT, or AI-related domains.
- Fluency in English for professional communication across documents, meetings, and technical coordination.
- Strong analytical thinking, clear communication style, and high ethical standards.
- Local nationality and familiarity with the cultural and administrative environment in the recruitment country.

Preferred:

- Prior experience in meteorology, government work, or technical cooperation programs.
- Hands-on experience with data visualization tools or weather-related data platforms.
- Strong interpersonal skills and ability to work effectively in cross-cultural environments.
