No permission to work in Japan required

Job Description

Our client is a global company that specializes entirely in technology and solutions for poultry hatcheries. Their core focus is on helping poultry producers hatch eggs reliably, efficiently, and at scale. Their biggest clients in Indonesia include two of Indonesia's biggest agrifood companies in the animal feed & poultry sector.

They are hiring for a Field Service Engineer on an independent contractor basis to lead the on site installation, commissioning, troubleshooting, and servicing of their incubators at customer sites, for example at JAPFA Comfeed and Malindo hatcheries across Indonesia.

This role is fully remote but will require frequent travel to their client sites around Indonesia.

The role is highly hands on and field focused, suited for engineers with strong electrical or mechanical troubleshooting

experience who are comfortable working independently on site. Industry background is flexible, as long as you have solid exposure to commissioning, maintenance and fault diagnosis in industrial environments.

This is a long-term contractor engagement with flexible assignment and clear non competing boundaries. Many of their long term engineers in Indonesia and worldwide today maintain their primary jobs or projects.
